

The world's only science based ergonomic mouse. That can switch hands on the go.

The HandshoeMouse Shift is the result of many years of field experience with the original HandshoeMouse. The ambidextrous Shift can be easily switched from left to right and provides additional comfort by extending the supporting area for hand palm, fingers and thumb. This will allow the user further relaxation during daily use while Bluetooth allows for easy digital wireless communication.

Bluetooth	Bluetooth is used for wireless operation
Poll rate	Poll rate (Herz) of the electronics is 113~118Hz and up to 120Hz.
